Software Engineer (Smalltalk)	Smalltalk, Ruby, Python and/or C++/Java (J2EE)/C#.Net		Bangalore	Permanent				Misys India	Mail to Zafeer.ahmed@misys.com	<p>Misys India is currently extending its engineering team for one of the premier financial product, which is currently implemented in more than 60% of the market space it occupies and used by many top tier global banks worldwide. The financial domain and knowledge area will be a challenge to the best brains in its current stage of development and engineering.</p> <p>Currently implemented in the best object oriented platform of Smalltalk, the application is rated as the most efficient, stable and fastest turnaround to market for new features. Misys is also engaged in transforming the solution to its next generation SOA enabled system for newer clients and segments.</p> <p>Misys requires the sharpest and the best engineering talent, highly experienced with object oriented design and development, capable of independently handling assigned project/project tasks. Capability in multiple languages, specially in Ruby, Python and/or C++/Java (J2EE)/C#.Net over a 6-15 years period is expected. Willingness to learn the new platform of Smalltalk and excel with it is pre-requisite. Smalltalk skills of expert levels, displayed in various projects in the past will be an asset. Understanding of the financial domain will be considered an advantage or past ability in learning domain knowledge pro-actively needs to be exhibited.</p> <p>Baseline is the engineer's past ability in any other platforms/languages which exceeds the average ability. Keen intellect and willingness to think out of the box will be appreciated. The remuneration will be commensurate to the skills and ability of the individual.</p> <p>Educational qualification of B.Tech and Masters in CS will be preferred.</p> <p>Interested people could send an updated profile to Zafeer.ahmed@misys.com <mailto:Zafeer.ahmed@misys.com>.</p>	31 July 2009
